FAIZAN ALI
Bachelor of Science in Information Technology

Email: your.email@example.com | Phone: +92 XXX XXXXXXXX
GitHub: github.com/faizanali78627 | github.com/fastudyrevision-oss
Location: Islamabad, Pakistan

=====

PROFESSIONAL SUMMARY

=====

IT professional with a Bachelor's degree in Information Technology with expertise spanning cloud computing, DevOps, automation, cybersecurity, and data analytics. Proficient in Python programming, cloud configuration, Git version control, Linux system administration, and data analysis methodologies. Strong foundation in database management, SQL, security fundamentals, and business intelligence with hands-on experience in Kali Linux, penetration testing, and analytics tools. Certified in Google IT Automation, Cybersecurity, and Data Analytics specializations. Committed to designing scalable cloud solutions, implementing secure infrastructure, optimizing system performance, and deriving actionable insights from data.

EDUCATION

=====

Bachelor of Science in Information Technology (BS IT)
Specialized coursework in cloud computing, distributed systems, network architecture, and software development practices.

TECHNICAL SKILLS

=====

Programming Languages: Python, Bash, PowerShell, JavaScript
Cloud Platforms: AWS, Azure, Google Cloud Platform
Version Control: Git, GitHub, GitLab
Security & Linux: Kali Linux, Cybersecurity Basics, Penetration Testing Fundamentals
Database Management: SQL, NoSQL, Database Design & Fundamentals
DevOps & Automation: Configuration Management, Infrastructure Automation, CI/CD
Frameworks: Flutter, Django, FastAPI, React, PHP
Additional: Docker, REST APIs, Machine Learning, Data Analysis

CORE COMPETENCIES

=====

- Python Programming & Scripting
- Operating System Management & Administration (Linux, Windows)
- Cloud Computing Architecture & Configuration (AWS, Azure, GCP)
- Version Control Systems (Git & GitHub)
- Cybersecurity Fundamentals & Best Practices
- Kali Linux & Security Tools

- Database Design & Management (SQL, NoSQL)
- Data Analysis & Visualization
- Business Intelligence & Analytics
- Configuration Management & Infrastructure Automation
- System Administration & Troubleshooting
- Agile/Scrum Methodologies
- Full-Stack Web Development
- Machine Learning & AI Integration

REAL-WORLD PROJECTS

=====

1. MIAN TRADERS INVOICE MANAGEMENT SYSTEM

GitHub: <https://github.com/fastudyrevision-oss/invoice-app>

Technologies: Dart, Flutter, SQLite, Provider, Gemini AI API, Clean Architecture

Engineered a comprehensive full-stack desktop & mobile ERP solution using Flutter and Clean Architecture, supporting Windows, Android, and iOS platforms. Implemented intelligent inventory management system tracking products by batch numbers and expiry dates with automated stock-out alerts. Built complete financial engine featuring automated invoicing, purchase management, expense tracking, and Double-Entry Ledger system with real-time Profit/Loss reporting. Optimized local storage using SQLite with WAL mode and custom indexing for high-performance offline-first operations. Developed custom thermal printing engine supporting professional receipt customization including Urdu headers and logos. Integrated Gemini AI via custom SQL Agent service for natural language data queries and insights. Implemented comprehensive data export services (PDF, Excel, CSV) and full Urdu localization with RTL layout optimization.

2. FULL-STACK ART & STATIONERY E-COMMERCE PLATFORM

GitHub: <https://github.com/fastudyrevision-oss/Store>

Technologies: PHP, MySQL, JavaScript, HTML5, CSS3, Canvas Graphics

Developed comprehensive full-stack e-commerce platform with multi-role authentication (Admin, Seller, Customer) incorporating CSRF protection and salted password hashing. Engineered custom PHP synchronization engine to audit and reconcile 100+ product images with database records. Implemented high-performance generative particle background using HTML5 Canvas API, creating dynamic aesthetic with real-time mouse interaction. Designed innovative "Kinetic Collage" advertisement section using advanced CSS 3D transforms achieving organic art-studio feel while maintaining mobile responsiveness. Built complete MVC-style inventory system enabling sellers to manage product status, pricing, and stock.

3. WEB SCRAPING & DATA ENGINEERING PIPELINE

GitHub: https://github.com/faizanali78627/web_scraping_projects

Technologies: Python, BeautifulSoup, Selenium/Playwright, Pandas, Requests

Developed comprehensive suite of web scraping scripts for extracting large-scale healthcare provider data from multiple geographic regions, processing datasets ranging from 1.4MB to 6.3MB per location. Implemented multiple scraping techniques from basic DOM parsing to advanced dynamic content rendering using browser automation. Engineered performance-optimized solutions utilizing concurrent/parallel HTTP requests for faster data collection at scale. Designed sophisticated data pipeline with Pandas-based CSV export and validation workflows.

4. SOCIAL MEDIA RECOMMENDER SYSTEM (FULL-STACK ML APPLICATION)

GitHub: <https://github.com/fastudyrevision-oss/social-recommender>

Technologies: Python, FastAPI, React 18, FAISS, Sentence Transformers, CLIP, Redis, Docker, Docker Compose

Architected comprehensive full-stack machine learning application combining behavior tracking, vector embeddings, and real-time analytics. Developed FastAPI backend with RESTful API design and SQLAlchemy ORM. Implemented sophisticated ML pipeline utilizing Sentence Transformers for text-to-vector conversion and CLIP for multimodal understanding. Engineered FAISS-based vector similarity search delivering sub-100ms query latency. Optimized performance with Redis caching achieving 50-100x speedup. Developed modern React 18 frontend with Tailwind CSS and WebSocket integration for real-time updates. Containerized entire stack using Docker and Docker Compose.

Key Metrics: Sub-100ms query latency | 50-100x cache improvement | 100k+ post scalability | Real-time recommendation delivery

5. E-COMMERCE PLATFORM (FULL-STACK LEARNING PROJECT)

GitHub: https://github.com/faizanali78627/juh_ecommerce

Technologies: React, TypeScript, Django REST Framework, PostgreSQL, JWT

Developed full-stack e-commerce application demonstrating core e-commerce functionality. Built React TypeScript frontend featuring product listings with media support, shopping cart interface, and order tracking. Implemented Django REST Framework backend providing RESTful API endpoints. Engineered user authentication system utilizing JWT tokens for secure session management. Designed relational PostgreSQL database schema with proper modeling for products, orders, carts, and user associations. Integrated email notification system for administrative order alerts.

6. BLOCKLEARN - BLOCKCHAIN SIMULATOR & EDUCATIONAL TOOL

GitHub: <https://github.com/fastudyrevision-oss/BlockLearn>

Technologies: C++, REST API, HTTP Server, JSON, Proof-of-Work Algorithm

Developed comprehensive blockchain simulator providing hands-on understanding of blockchain mechanics. Built lightweight REST API exposing clear endpoints

for all blockchain operations. Implemented functional proof-of-work mining system with adjustable difficulty parameters. Engineered transaction pool management with block validation. Designed wallet balance tracking system with transaction history. Implemented data persistence layer with CORS configuration enabling seamless frontend integration.

7. HOSPITAL MANAGEMENT SYSTEM

GitHub: https://github.com/fastudyrevision-oss/Basic_hospital_management_system
Technologies: PHP 7.4+, MySQL, PDO, HTML5, CSS3, JavaScript, Bcrypt

Built comprehensive hospital management system enabling complete healthcare facility operations across multiple user roles (Admin, Doctor, Patient, Staff). Implemented secure authentication with bcrypt password hashing and role-based access control. Engineered full-featured modules for doctor management, patient records, appointment scheduling, medicine inventory, and billing system. Designed relational MySQL database schema with 8 interconnected tables. Applied security best practices including SQL injection prevention via prepared statements, XSS protection, input sanitization, and secure session management. Implemented modern, responsive UI utilizing CSS Grid/Flexbox and CSS3 animations.

PROFESSIONAL CERTIFICATIONS

GOOGLE PROFESSIONAL CERTIFICATES

Google IT Automation with Python Professional Certificate

Seven-course comprehensive program in Python programming, Git version control, and IT automation. Hands-on curriculum teaching automated script writing with focus on IT support and systems administration. Demonstrated mastery by achieving 80%+ on all graded assessments.

Courses Completed:

- Crash Course on Python

https://drive.google.com/file/d/10b1EAhoZCJmogaCYiGA60opfSwqyZF_n/view?usp=drive_link

- Using Python to Interact with the Operating System

https://drive.google.com/file/d/1QJu81cmXMDg6Qm3hixjhUHJDjP6mjpe8/view?usp=drive_link

- Configuration Management and the Cloud

https://drive.google.com/file/d/1-TU7e27bzJskyN0KUP4_rJEbn48FP5SX/view?usp=drive_link

- Introduction to Git and GitHub

https://drive.google.com/file/d/1KlW0BepS7zrbWYDws4-SzpTOYuN4L3zd/view?usp=drive_link

k

- Troubleshooting and Debugging Techniques

https://drive.google.com/file/d/1w6ywQWJGZ845fAulHtM6V-Useh0aRDjN/view?usp=drive_link

- Automating Real World Tasks with Python

https://drive.google.com/file/d/131Nd6meQLlplW78KjMyz3mrjf97808fE/view?usp=drive_link

- Google IT Automation with Python Specialization (7-Course Program)

https://drive.google.com/file/d/19-LYjNkCcdkyUYHT4r1orCsX-fU8JBVS/view?usp=drive_link

Google Cybersecurity Professional Certificate

Comprehensive cybersecurity training covering security fundamentals, threat analysis, incident response, and security operations. Tools of Trade: Linux, SQL, Python, Kali Linux.

Courses Completed:

- Foundations of Cybersecurity

https://drive.google.com/file/d/1aLSKI6vYPRnPZ7M4-cUOQJ7F6B2GLqEI/view?usp=drive_link

- Automating Cybersecurity Tasks with Python

https://drive.google.com/file/d/1sxk5Cd1o2K9oq74IiJjHsK4NvxhfEoRj/view?usp=drive_link

- Tools of Trade: Linux and SQL

https://drive.google.com/file/d/1p2liCzbqr7Fh_4RXdQUXTr3UGPxcSJd4/view?usp=drive_link

Google Data Analytics Professional Certificate

Comprehensive data analytics training program covering data analysis methodologies, visualization techniques, statistical analysis, and business intelligence. Demonstrated proficiency in identifying patterns, creating compelling visualizations, and deriving actionable business insights.

Courses Completed:

- Foundations of Data Analytics & Data Everywhere

https://drive.google.com/file/d/1-IzIkuQ3pr0gHzax85irz4vIlxozzdHy/view?usp=drive_link

SIMPLILEARN CERTIFICATIONS

- Introduction to Kali Linux Basics

https://drive.google.com/file/d/1T0mfA0lZJKMUqIm4hJnZc38YWMUX5AwG/view?usp=drive_link

- Introduction to Cloud Computing

https://drive.google.com/file/d/1TarmIomWVma6NfosBbv9MTBxwaAHZzr-/view?usp=drive_link

- Introduction to Fundamentals of Databases

https://drive.google.com/file/d/1pWfoaUd1uegZYXSZUCBxjcKdlZRro9u4/view?usp=drive_link

- Getting Started with AWS

https://drive.google.com/file/d/1ePnNmED6PybDzmnmxrlHGWTeY_-06_mU/view?usp=drive_link
